Subject: Proposed Agenda for Dec 1 EJSC Meeting

Hi Deb,

Since it doesn't look like we'll be able to connect until the day before the meeting I thought I'd propose an agenda for your approval so that we can get it out to the EJSC in advance and so that I can get material pulled together before the meeting on Dec 1st. Here's what I would propose based on the list of ideas in the e-mail below (plus one item that I forgot to put on the list):

- Welcome – Deb – 5 min
- Updates – Corbin – 5 min [I thought I'd use this time to provide a quick update on our interim solution to EJAT leadership/facilitation as well as the status of the FY21-22 R8 EJ Action Plan and FY20 EOY status update]
- Commerce City – North Denver (formerly known as Industrial Triangle) effort – Corbin – 15 min [update EJSC on effort, CDPHE's focus on engaging community on Suncor SEP, share current list of EPA activities in the area and discuss how it will be used]
- Transition: share update from OEJ's transition discussions with the EJ program (OEJ, regions, NPMs) and begin Regional discussion of EJ needs and desires for the next four years (i.e. resources/tools/priorities, etc.) – Deb/Corbin – 15 min [Share highlights from Biden EJ plan and engage EJSC in discussion re: tools, resources, areas of national EJ focus, etc. that would help us make progress during the next administration].
- Wrap Up / Action Items – Deb/Corbin – 5 min

Corbin

Subject: Possible Agenda Items for Dec 1 EJSC Meeting

Deb and Melanie,

For discussion during our EJSC prep meeting on Monday (11/23, 8:30am), here are some thoughts regarding potential agenda items for our EJ Steering Committee meeting scheduled for December 1st. Note that the meeting on the 1st is a shortened meeting (45 min) so won't have time to cover all of these topics:

- Transition: share update from OEJ's 11/19 transition discussion with the EJ program (OEJ, regions, NPMs). Engage EJSC in discussion re: tools, resources, areas of national EJ focus, etc. that would help us make progress during the next administration.
- Commerce City – North Denver (formerly known as Industrial Triangle) effort: update EJSC on effort, CDPHE's focus on engaging community on Suncor SEP, and share current list of EPA activities in the area)
- Update on status of FY21-22 R8 EJ Action Plan and FY20 EOY Progress reporting.
- Brief EJSC on Colorado's Climate Equity Framework, GHG Roadmap, and my role on Advisory Committee.
- Provide update on Actions to Address EJ Integration Barriers (could have a member of the EJAT subgroup do this)
- EJSCREEN update and refresher: new version, bowling chart measure, training, and refresher for EJSC.
